

SN. 10/021,890

ATTORNEY DOCKET NO. CANO:038

IN THE CLAIMS

*The status of the claims as presently amended is as follows:*

1. *(Currently Amended)* A data communication apparatus comprising:

an inputter arranged to input file data;

a setter arranged to set a subjectfield SUBJECT: of a header of an electronic mail to be transmitted;

a producer arranged to produce a file name of the file data input by said inputter based on the subjectfield SUBJECT: set by said setter; and

a transmitter arranged to transmit electronic mail data including the file data input by said inputter, the subjectfield SUBJECT: set by said setter, and the file name produced by said producer.

2. *(Original)* A data communication apparatus according to claim 1, wherein said inputter inputs the file data obtained by reading an image on an original.

3. *(Original)* A data communication apparatus according to claim 1, wherein said inputter inputs the file data obtained from a detachable memory.

4. *(Currently Amended)* A data communication apparatus according to claim 1, wherein said producer produces the file name based on a number of the file data input by said inputter and the subjectfield SUBJECT: set by said setter.

5. *(Original)* A data communication apparatus according to claim 1, wherein said producer produces the file name in accordance with a kind of the file data input by said inputter.

6. *(Currently Amended)* A method of producing electronic mail data to be transmitted, comprising the steps of:

inputting file data;

setting a subjectfield SUBJECT: of a header of an electronic mail to be transmitted; and

SN. 10/021,890

ATTORNEY DOCKET NO. CANO:038

producing a file name of the file data input in said inputting step based on the ~~subject~~field SUBJECT: set in said setting step.

7. (*Currently Amended*) A computer readable program stored in a storage medium, comprising:
- an inputting module for inputting file data;
  - a setting ~~module~~module for setting a ~~subject~~field SUBJECT: of a header of an electronic mail to be transmitted; and
  - a producing module for producing a file name of the file data input by said inputting module based on the ~~subject~~field SUBJECT: set by said setting module.
